**PETITION UNDER 37 C.F.R. § 1.182 TO WITHDRAW
A PREVIOUSLY FILED TERMINAL DISCLAIMER**

Sir:

Applicants hereby petition to withdraw a previously filed Terminal Disclaimer.

Submitted with this Petition is the required fee of \$130.00, copies of the Office Action mailed September 16, 1996, the Terminal Disclaimer filed December 13, 1996 and the claims of U.S. Patent No. 5,545,619.

It is believed that no additional fee is required with this submission. However, should an additional fee be required, the Commissioner is hereby authorized to charge the fee to Deposit Account No. 50-1868.

Remarks

Applicants hereby petition to withdraw a previously filed Terminal Disclaimer. Claim 9 was rejected in the Office Action mailed September 16, 1996, for non-statutory double patenting over claim 10 in U.S. Patent 5,545,619. A copy of this Office Action and the claims from U.S. Patent 5,545,619 are appended for convenience. Applicant's response dated December 13, 1996 included a terminal disclaimer to obviate this double patenting rejection. A copy of this Terminal Disclaimer is also appended for convenience.

Applicant's respectfully request withdrawal of the terminal disclaimer filed in the response dated December 13, 1996 in favor of cancellation of claim 9. An amendment has been concurrently filed with this petition to cancel claim 9. Cancellation of claim 9 would remove any double patenting issues.

CLAIM CANCELLATION MAY OBVIATE A DOUBLE PATENTING REJECTION

Although the present rejection was for *non-statutory* double patenting, the MPEP provides for cancellation of claims as a means for generally obviating double patenting rejections. Specifically, "A rejection based on the statutory type of double patenting can be avoided by amending the conflicting claims so that they are not coextensive in scope. Where the conflicting claims are in one or more pending applications and a patent, a rejection based of statutory type double patenting can also be avoided by canceling the conflicting claims in all the pending applications..." (MPEP 804.02)

U.S.S.N. 08/126,505

Filed: September 24, 1993

PETITION UNDER 37 C.F.R. 1.182 TO WITHDRAW A TERMINAL DISCLAIMER

In view of the Applicant's removal of the conflicting claim so that claims are not coextensive in scope, any need for a terminal disclaimer would be removed.

Grant of this petition is respectfully solicited.

Respectfully submitted,

DETAILED ACTION

Information Disclosure Statement

1. Applicant is reminded that the form 1449 filed with the IDS of 1/22/96 is incomplete in several citations. Please see Paragraph No. 4, Paper No. 18.

Double Patenting

2. The non-statutory double patenting rejection, whether of the obviousness-type or non-obviousness-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent. *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); and *In re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(b) and (c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78(d).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 9 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 10 of U.S. Patent No. 5,545,619. Although the conflicting claims are not identical, they are not patentably distinct from each other because they overlap; e.g. the instant claims recite changes at positions 109-112 (NAAH), 114-117. . . 121 (STKP. . . Q); 116 (K); and 116-117 (KP) which are identical to particular species recited in '619.

Applicant's amendment of claim 9 removed certain of the species which overlap; however, certain other overlapping species remain. Therefore, this rejection is maintained for reasons of record.

Art Unit: 1812

Claim Rejections - 35 USC § 112

4. Claims 8-9 and 23-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear what the “analog of a protein” in claims 8 and 9 refers to since the analog is not clearly defined in the preamble of the claims. In addition, it is not clear whether “those complement regulating proteins wherein the carboxy terminus is removed” refers to those proteins which are recited in the claims or if it refers to other complement regulating proteins. It is suggested that the preamble of claims 8 and 9 be amended such that it is comparable to that of claim 1 of U.S. Pat. No. 5,545,619, such that it recites:

An analog of a protein [regulating complement activation having short consensus repeats of amino acid sequence] selected from the group consisting of complement receptor 1, complement receptor 2, decay accelerating factor, membrane cofactor protein, C4 binding protein, and factor H, and [those] these complement regulating proteins wherein the carboxy terminus is removed to allow the protein to be secreted, wherein the protein analog contains [a change within a] amino acid substitutions in the short consensus repeats [that] which correspond [with a change to] to amino acid substitutions in the short consensus repeats of complement receptor one [as shown in] (SEQ ID NO: 13) selected from the group consisting of:

Claims 23-24 are unclear because “the protein analog” lacks antecedent basis in the claim, and thus it is unclear whether the claimed method is directed to making the protein analog or another type of protein. It is suggested that the claims be amended to recite:

Art Unit: 1812

A method for making a protein analog [regulating complement activation having short consensus repeats of amino acid sequence] selected from the group consisting of complement receptor 1, complement receptor 2, decay accelerating factor, membrane cofactor protein, C4 binding protein, and factor H, and [those] these complement regulating proteins wherein the carboxy terminus is removed to allow the protein to be secreted, wherein the amino acid sequence of the protein analog is changed by amino acid substitutions in the [a] short consensus repeats [to] which correspond to amino acid substitutions in the short consensus repeats of complement receptor one [as shown in] (SEQ ID NO: 13) selected from the group consisting of:

Conclusion

5. The claims are free of the prior art of record.
6. Applicant's arguments that the remaining claims in the instant application should be examined are not persuasive because as discussed previously, in Paragraph No. 3, Paper No. 18, none of the pending, non-examined claims are generic to the examined species. However, claims drawn to the species elected in Paper No. 8, which includes complement regulatory proteins in which various SCRs are swapped between different proteins as well as truncated variants thereof, would be examined if claims presented to only those species were presented. Please see Paper No. 8 for the claims that were examined in that Office Action.
7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1812

A shortened statutory period for response to this final action is set to expire THREE MONTHS from the date of this action. In the event a first response is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than SIX MONTHS from the date of this final action.

TERMINAL DISCLAIMER TO OBVIATE A DOUBLE
PATENTING REJECTION OVER A PATENT

Sir:

Washington University is the owner of the entire interest in the above-identified application as evidenced by the accompanying certificate under 37 C.F.R. § 3.73(b).

Washington University hereby disclaims, except as provided below, the terminal part of the statutory term of any patent granted on the instant application, which would extend beyond the expiration date of the full statutory term defined in 35 U.S.C. §§ 154-156 and 173 of U.S. Patent No. 5,545,619 which issued August 13, 1996. Washington University hereby agrees that any patent so granted on the instant application shall be enforceable only for and during such period that it and U.S. Patent No. 5,545,619 are commonly owned. This

agreement runs with any patent granted on the instant application and is binding upon the grantee, its successors or assigns.

In making the above disclaimer, Washington University does not disclaim the terminal part of any patent granted on the instant application that would extend to the expiration date of the full statutory term as defined in 35 U.S.C. §§ 154-156 and 173 of U.S. Patent No. 5,545,619, in the event that any such granted patent: expires for failure to pay a maintenance fee, is held unenforceable, is found invalid by a court of competent jurisdiction, is statutorily disclaimed in whole or terminally disclaimed under 37 C.F.R. § 1.321, has all claims cancelled by a reexamination certificate, is reissued, or is in any manner terminated prior to the expiration of its full statutory term as shortened by any terminal disclaimer filed prior to its grant.

The undersigned (whose title is supplied below) is empowered to act on behalf of Washington University.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the

United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
